

**NON-SURGICAL SKIN
REJUVENATION**

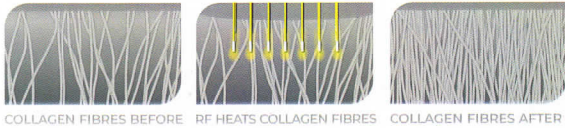

It's a force
like no other!

NEW! IN DEMAND TREATMENT

Introducing 3D Dermaforce, an advanced cutting-edge treatment combining Microneedling and Radio Frequency (RF) technology to effectively treat a large number of facial and body concerns, with amazing results.

Microneedling/RF is the latest innovative solution for the ultimate 'non-surgical skin rejuvenation' and is in extremely high demand after the extensive coverage that the treatment has received throughout the press.

HOW IT WORKS:

Radio frequency energy is delivered precisely through insulated needles to the dermis heating the collagen fibres to 55°C–65°C. This stimulates the body's natural healing process resulting in the production of collagen and elastin in these areas.

LOOKING AT MY RESULTS AFTER JUST ONE TREATMENT, I CANNOT BELIEVE IT. THIS TREATMENT IS INCREDIBLE, EVEN MY FRIENDS HAVE NOTICED AND SAID I LOOK YOUNGER!

I WAS APPREHENSIVE AS I THOUGHT THE PROCESS MAY BE PAINFUL, AND ALTHOUGH THERE WAS SLIGHT DISCOMFORT, THERE WAS NO PAIN.

– JACKIE, WARWICKSHIRE

THIS TREATMENT IS SO VERSATILE THAT IT CAN BE USED TO TARGET A NUMBER OF CONCERNS ON BOTH THE FACE AND BODY INCLUDING:

LOOSE AND SAGGING SKIN

FINE LINES AND WRINKLES

SUN DAMAGE/ PIGMENTATION

STRETCH MARKS

PITTED SKIN/ SKIN TEXTURE

POPULAR TREATMENT AREAS INCLUDE:

- Face and brow
- Neck and décolleté
- Abdomen
- Crow's feet
- Marionette lines
- Above the knees
- Nasolabial fold
- Jowls and jawline
- Necklace lines

3D DERMAFORCE FAQs

What is 3D Dermaforce?

3D Dermaforce Microneedling/RF is an advanced method of skin rejuvenation that stimulates the body's natural healing process. This encourages collagen production in the dermis resulting in rejuvenated and tightened skin.

What areas can be treated?

It is safe for use on the face and body. It will have a positive effect on loose skin, fine lines and wrinkles, sun damaged/pigmented skin, stretch marks and pitted skin.

What results can you expect?

Your skin will look plump due to the increase in

thickness of the dermal tissue caused by collagen production. This will give an improvement to lines, wrinkles and crepey skin. Pigmentation patches will improve and even the tone of the skin. Improves the quality of textured skin. Stretch marks and loose skin can also be improved during a course of treatments.

How does the treatment feel?

During treatment, the radio frequency energy is delivered through the gold plated, insulated needles allowing precise delivery to the dermis. There is a slight warmth and pressure in the skin during application. Your skin will be slightly

pink after treatment and may feel similar to when you have been in the sun.

Who is a good candidate for the treatment?

This treatment can be suitable for women and men over the age of 18. A full consultation will be given prior to treatment*.

Is there any downtime after the treatment?

You will possibly experience pinkness in the skin and a slight swelling, this may last for up to three days. Your skin may feel slightly dry, your therapists will recommend 3D hydrating products and 3D SPF for you to use at home daily.

**More advice on contra-indications will be provided during consultation.*
